PHONE	+370 653 98316
ADDRESS	Ašigalio g. 17-2, Kaunas, Lithuania

7+	1,000+	100+	250+
YEARS ON THE SHOP FLOOR	PARTS FABRICATED	CNC PROGRAMS WRITTEN	QUALITY INSPECTIONS

A PROFILE

Machinist and mechanical engineer with a background in precision repair parts for Boeing 737-800NG aircraft.

Self-taught, with a record of leading a machine shop and automating manufacturing work. I've written the programs, run the machines and inspected parts against EASA airworthiness standards, so I know where a tolerance gets lost and how to keep it.

NATIONALITY	Lithuanian
BORN	8 February 1990
LICENCE	Class A + B
WORKS	Remote or on-site, EU

B EXPERIENCE

MAR 2017 – JAN 2024 · DRAWN TO SCALE

LEAD MECHANICAL INSPECTOR

May 2019 – Jan 2024 **4 y 8 mo** KARMĖLAVA, LT AEROSPACE

UAB „Kaunas Aircraft Maintenance Services"

Mechanical inspection of aircraft components and systems, with strict compliance to safety rules, EASA regulations and airworthiness quality standards.

RESPONSIBILITIES

- Inspected aircraft components and systems end to end
- Kept work compliant with safety, EASA and airworthiness standards
- Worked with engineering teams to resolve issues per Boeing procedures
- Ran the complete machine shop: operations and staff

RESULTS

- Mastered fabrication of Boeing 737-800NG repair parts
- Promoted to Workshop Lead Mechanical Inspector after 2 years
- Managed complete machine shop operations

PRODUCTION OPERATOR-TECHNOLOGIST

Sep 2018 – May 2019 **8 mo** LITHUANIA MANUFACTURING

UAB „Techranga"

Ran and maintained advanced CNC production equipment, carrying parts from 3D model and CNC program through to finished, assembled work.

RESPONSIBILITIES

- Operated and maintained advanced CNC production equipment
- 3D modelling and CNC programming for production
- Designed and made parts on milling, turning and EDM machines
- Managed technical drawings and on-site assembly; fixed production issues

RESULTS

- Designed and made complex parts across several CNC technologies
- Handled technical drawings and project assembly independently

B EXPERIENCE

CONTINUED

CNC OPERATOR-PROGRAMMER

UAB „Baltic Home“

Mar 2017 – Sep 2018 **18 mo** LITHUANIA CNC

Programmed and ran CNC machines across a wide range of parts, keeping accuracy and quality high.

RESPONSIBILITIES

- Operated and programmed CNC machines for varied parts
- Checked the accuracy and quality of every part produced
- Worked with engineers and designers to improve machining

RESULTS

- Held high accuracy and quality standards
- Contributed to process improvement work

C SKILLS

SELF-ASSESSED · 0–100

MANUFACTURING 5

CNC programming	95
CNC operation	95
Quality control & inspection	93
Precision fabrication	92
Machine shop management	88

SOFTWARE 4

CAD / CAM systems	90
Technical drawing interpretation	90
Autodesk Fusion 360	85
3D modelling	85

PROCESSES 5

Metalworking	92
Milling	90
Turning	90
EDM (electrical discharge)	85
Woodworking	75

G INTERESTS

AI & agents · Prediction markets · Motorcycles · Manufacturing automation · Aerospace technology · Space exploration · Mars colonisation

LONG-TERM GOAL

Push manufacturing quality forward and contribute to aerospace innovation. I want to see humanity reach Mars, and to help build the machines that get it there.

D AI & DIGITAL

AI
Using AI tools day to day for engineering, research and writing.

AI AGENTS
Building and running agents that automate multi-step work.

POLYMARKET
Trading on prediction markets with AI automation, pricing probabilities on real-world events.

CONTENT CREATION
Video on TikTok, YouTube and Facebook as @KrutasLTU.

E LANGUAGES

LITHUANIAN — NATIVE

ENGLISH — PROFESSIONAL WORKING

F CERTIFICATIONS

- Boeing 737-800NG repair parts fabrication
- EASA regulations compliance
- Airworthiness quality standards
- Boeing maintenance procedures
